Ankit kumar

Mobile Application Developer | Dart | Flutter | Firebase | Rest APIs

I'm a self-motivated and detail-oriented Flutter Developer who loves building real-world, scalable, and visually perfect mobile apps. At Forwardcode Techstudio, I've worked on actual production apps where I implemented role-based authentication, deep linking, and OAuth logins (Google, Facebook, Apple). I'm confident working with Bloc, GetX, and MVVM for clean and maintainable architecture. I also have experience integrating REST APIs using Dio, converting Figma/XD designs into pixel-perfect UIs, and adding advanced features like PDF/Excel report generation, offline storage with Hive, and multi-theme support. I focus on writing clean, optimized code and delivering features that solve real business problems and improve user experience.

Experiences

Software Engineer

Forwardcode Techstudio — Nov 2023 – Present

- Built cross-platform mobile apps with advanced features like role-based access, deep links, and multi-user management systems.
- Integrated OAuth login with Google, Facebook, and Apple using Firebase.
- Created production-ready UI from Figma/XD designs using Flutter with pixel-perfect precision.
- Implemented advanced PDF and Excel report generation modules for management features.
- Used Dio for scalable REST API integrations with interceptors, error handling, and token refresh logic.
- Followed Bloc architecture with Bloc and GoRouter for modular, testable codebases.
- Deployed apps to Google Play and app store ensured performance optimization using Flutter DevTools.

Web Development Intern

Adityapur Auto Cluster — Feb 2023 – May 2023

- Developed chat application and user interfaces using HTML, CSS, Bootstrap, JavaScript, MySQL, Python and Django.
- Collaborated with teams to integrate REST APIs and improve backend connectivity.
- Used Git for version control and participated in Agile stand-ups and sprints.

Projects (Available on GitHub)

My Notes App

- Feature-rich offline notes app with Hive for local storage, dark/light themes, and smart filtering.
- Allows users to create notes by date, edit, delete, and search notes.
- Published on Google Play Store and Indus App Store.

Music Player

- Local MP3 player with custom theming, UI color picker, and light/dark mode toggle.
- Built using Flutter packages for audio playback and animated UI elements.
- Published on Google Play Store and Indus App Store.

WhatsApp Clone

- UI-focused Flutter clone of WhatsApp's design, created using Material widgets for visual accuracy.
- Source code

Skills & Technologies

Languages & Frameworks
Flutter, Dart, Firebase, REST API, Git, GitHub

State Management
Flutter BLoC, GetX, Bloc architecture, MVVM

Routing & Navigation
GoRouter, Deep Linking,

Auth & Security
Firebase Authentication, Google/Facebook/Apple OAuth Authentication, Role-Based Access, Secure storage

Tools
VS Code, Android Studio, Xcode, GitHub, Dio, FCM, Crashlytics

Others
PDF/Excel Reports, Push Notifications, Shared Preferences, App Publishing on Google Play store and Apple Store

Languages

English – Professional Proficiency

Hindi – Native Speaker

Education

Bachelor of Computer Applications (BCA)

Mrs. KMPM Vocational College, Jamshedpur

Graduated: 2023
Scored: 87.63% (First Class with Distinction)
Outstanding Student Award – for academic excellence and technical contribution certificate.
